Introduction

- Food waste is a major global issue.
- Millions of people still suffer from hunger.
- Lack of coordination between food donors and needy people.
- FoodSaver Connect aims to bridge this gap using technology.

Problem Statement:

- Huge amount of food is wasted daily.
- No proper system to redistribute surplus food.
- Difficulty in identifying real-time needy locations.
- Lack of tracking in food delivery.
- Inefficient communication between donors and volunteers.

Proposed Solution:

- A centralized web platform for food donation
- Real-time GPS-based needy location reporting
- Smart matching of donors and requests
- Delivery tracking system
- Community-driven volunteer participation

System Architecture:

- Frontend: HTML, CSS, JavaScript, Bootstrap.
- Backend: Django + Django REST Framework.
- Database: SQLite3.
- Maps: Leaflet.js.
- User Roles: Donor | Scout | Admin.

Working Process:

- Donor uploads surplus food
- Scout reports needy location
- System matches food with request
- Volunteer assigned for delivery
- Real-time delivery tracking
- Food delivered successfully

Technologies Used:

- Backend → Django 4.2
- Database → SQLite3
- Frontend → HTML, CSS, JS
- UI → Bootstrap
- Authentication → Django Auth
- Framework → Django REST , Pillow , Leaflet.js , Bootstrap

Rescue Food. Feed Lives.
Reduce Waste.
Bridge the gap between surplus food and those in need. Join our real-time food rescue network to track deliveries, discover needy locations, and make a tangible impact in your community.
DONATE FOOD
BECOME A SCOUT
HOW IT WORKS
Three simple steps to rescue surplus food and deliver it to communities in need.
Every meal saved is a life touched.
1. List Surplus Food
2. Scout Needy Locations
3. Deliver & Verify

Conclusion:

- FoodSaver Connect provides a smart solution for hunger and food waste.
- Uses technology for social impact.
- Encourages community engagement.
- Scalable for real-world implementation.
